

The Longboard Store Fresh Produce Program:

The Longboard Store Fresh Produce section is a launching pad for new longboard companies. We receive over 20,000 visitors each day, so there is no better way to get noticed.

The Fresh Produce section works like a consignment program. Companies are limited to sending in only two deck models, and we will need two of each model for stocking. If you send more than two models, we will only use two that we choose from. If you send only one of each model, then we will not be able to submit the product for sale. Please be sure to only send decks. We do not purchase completes from any supplier. Every complete longboard is custom built to order.

Please keep in mind that we only pay in advance for our regular suppliers, and this is a consignment program only. This means that you will need to pay for shipping to The Longboard Store, and that you will be paid when the product sells.

You will need to provide us with a suggested retail price. If a product is sold, we will pay out 55% of the retail price that is used on our website plus an additional \$2 per board for shipping. Payment will be made by credit card or by PayPal only.

If a product is performing very well, we will evaluate it for our regular sections. The Longboard Store has nearly 25 longboard deck companies, so it is important to provide a product that is unique. Do not send more longboards if your item shows out of stock. Our buyer will contact you, or you may contact us to discuss bringing more longboards in.

Thank you for your interest in The Longboard Store Fresh Produce Program. If you choose to try this program out, you will need to send us photos by email of the products you would like to submit. Do not send products without emailing us photos and receiving approval from us. If you have any questions, please contact us.

Cheers,
Jennifer
